

Juventus FC Website - Phase 2 Project Report

CSCI390: Web Programming | Spring 2025-2026

1. Project Overview

- **Student Name:** Hussein Khalaf
 - **Course:** CSCI390 - Web Programming
 - **Project Title:** Juventus FC Official Fan Portal
 - **Submission Date:** May 31, 2026
 - **GitHub Repository:** <https://github.com/hussein112001/juventus-fc-website-phase2-final>
 - **Live Website:** <https://hussein112001.github.io/juventus-fc-website-phase2-final/>
-

2. Executive Summary

This project represents the Phase 2 evolution of the Juventus FC web portal. Transitioning from a static HTML structure to a modern **ReactJS** application, the project implements a component-based architecture, responsive design, and professional UI/UX standards. The application features 5 core pages: Home, About, Squad, Trophies, and Contact.

3. System Design & Technologies

The system is built using a modern frontend stack designed for performance and scalability:

- **Core Framework:** React 19 with TypeScript for type-safe development.
- **Styling Engine:** Tailwind CSS 4 for rapid, utility-first UI development.

- **Routing:** Wouter for lightweight, client-side navigation.
- **UI Components:** shadcn/ui for accessible, professional-grade interface elements.

Technology Stack Breakdown:

Category	Technology
Frontend	React 19, TypeScript
Styling	Tailwind CSS 4, Lucide Icons
Build Tool	Vite
Deployment	GitHub Pages

4. Key Implementation Features

- **Responsive Architecture:** Fully optimized for Mobile, Tablet, and Desktop using Tailwind’s flexible grid system.
- **Branding:** Strict adherence to Juventus FC brand guidelines (Black, White, and Gold color palette).
- **Dynamic Components:** Modular React components for Squad profiles, Trophy showcases, and History timelines.
- **Interactive Forms:** Validated contact form with real-time feedback using toast notifications.

5. Code Snippets

5.1 Main Routing Structure

```
export default function App() {  
  return (  
    <div className="min-h-screen bg-background flex flex-col">  
      <Navigation />  
      <main className="flex-grow">  
        <Switch>  
          <Route path="/" component={Home} />  
          <Route path="/about" component={About} />  
          <Route path="/squad" component={Squad} />  
          <Route path="/trophies" component={Trophies} />  
          <Route path="/contact" component={Contact} />  
          <Route component={NotFound} />  
        </Switch>  
      </main>  
      <Footer />  
    </div>  
  );  
}
```

6. Conclusion

The Phase 2 implementation successfully achieves all project objectives, demonstrating a high level of proficiency in modern web development practices. The resulting application is a production-ready, responsive, and visually compelling fan portal for Juventus FC.
